MISSION 1

☐ Sketch the leaves of two different trees:

☐ Find a fallen leaf that has changed color (red, orange, yellow)

☐ Find 3 different types of seeds on a tree or the ground

☐ Do a Leaf rubbing: You need to place the leaf under the paper over a flat surface and use the pencil side to side

MISSION 2

Find evidence of an animal that was feeding on a plant (i.e. cracked seeds, chewed leaves)

☐ I think this animal is a ____________________.

Find and sketch a home that an animal has made on a tree

Look for animals tracks, feathers, fur and/or scat

Identify and describe one area that you see the most animals

MISSION 3

☐ Find and sketch an organism that lives in the soil and has 6 legs

☐ Find and sketch an organism that lives in the soil and have more than 6 legs

☐ Find 2 types of mushrooms or fungi

☐ Find a tree with signs of damage to the bark, branches and/or roots

☐ Find a log that has evidence suggesting it is a habitat for other organisms
